

Devised two scenarios for the east bank campus to improve connections between the campus and the Grand Rounds, a scenic parkway system stretching through the City of Minneapolis. Increased the amount of outdoor human space by reducing many of the vertical barriers that had isolated portions of campus. Created an outdoor sculpture garden to coincide with the indoor gallery space of the Weisman Art Museum. Improved the physical and visual connection on the mall between Northrop Auditorium and Coffman Memorial Union. The design also provided opportunities for the integration of light rail transit and multi-modal transit stations.

## CONNECTION - CAMPUS DESIGN

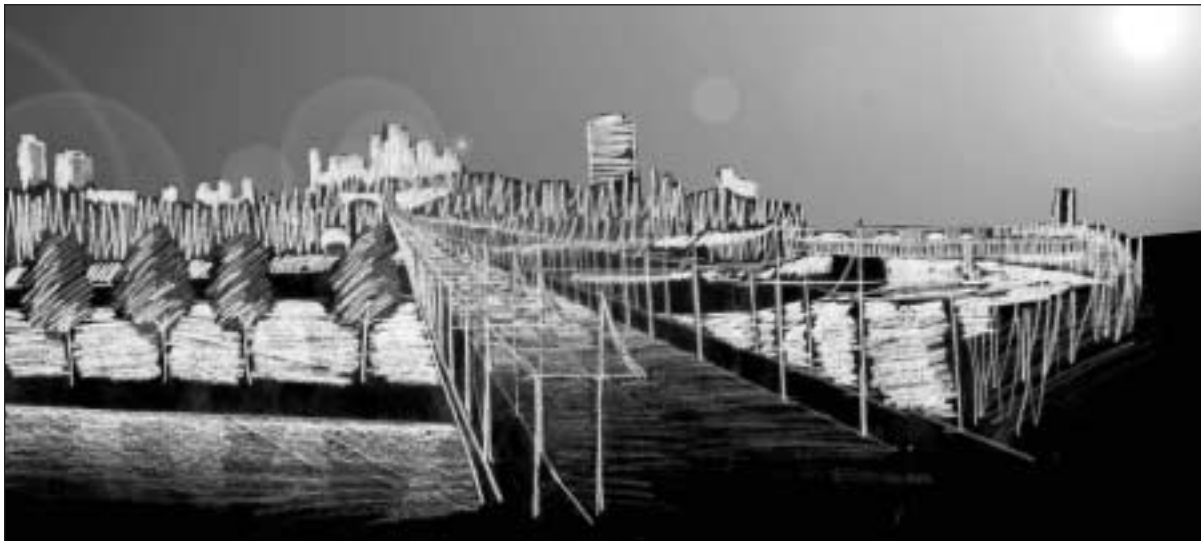

UNIVERSITY OF MINNESOTA, MINNEAPOLIS  
ZACHARY BLOCH

Option A - Burying Washington Avenue below grade and creating pedestrian plaza above (view of sculpter garden)

Option B - Place humans and transit at same grade creating multi-modal space (view of sculpter garden)

Reroute of Washington Avenue to Seven Corners
